Learn how **YOUR WOODS** can  
 work for **WILDLIFE!**

**YOU MAY BE ELIGIBLE FOR TECHNICAL AND FINANCIAL SUPPORT.  
 TALK TO A FORESTRY PROFESSIONAL ABOUT OPPORTUNITIES  
 AVAILABLE FOR YOUR FOREST.**

## IMPROVING YOUR FOREST'S HEALTH AND RESTORING HABITAT FOR A SONGBIRD

### Why is it important?

The Golden-winged Warbler has experienced a 90% population drop over the past 50 years due in part to loss of breeding habitat.

### What can I do about it?

Create/enhance young forest habitat on your property and promote native plant diversity.

### Is there assistance to help me?

Yes, you may be eligible! Talk with us about the availability of technical and financial assistance to help manage your forest.

### What are other benefits?

Young forest benefit many species like ruffed grouse, cottontail, and whip-poor-will, and native pollinators. Contact us to learn what other wildlife species call this habitat home.

## BENEFITS OF YOUNG FOREST HABITAT

Young forests are an important part of providing quality habitat for wildlife. Not only is it growing the next forest for future generations to enjoy, but it supplies wildlife with a combination of quality food and cover.

With the help of the U.S. Department of Agriculture's Natural Resources Conservation Service, private landowners can take advantage of technical and financial assistance opportunities to help plan and implement the creation of quality young forest habitat. Conservation practices available through NRCS *Working Lands for Wildlife* are grounded in sustainable forest management. These practices include invasive species control, forest stand improvement, and regeneration harvests.

PERFORATION

## Yes! I would like to learn more about this unique opportunity.
